ENVIRONMENTAL SCIENCE  
AND ENGINEERING INC

Triangle Environmental, for over 30  
years, has been providing quality  
Professional Environmental services

**John Cable,**  
Owner of Triangle Environmental,  
with John Cable Jr.

John received his B.S. and M.S. in  
Geological engineering from the  
University of Missouri-Rolla.

John Cable Jr. a proud Marine veteran  
Received his BS from Drury University

**Our company continues to grow by  
maintaining excellent relationships  
with our clients and seeking new  
customers. Triangle would like to help  
you with your environmental needs.**

**.....Please give us a call!!.....**

# ASBESTOS INSPECTIONS AND AIR MONITORING

## ASBESTOS

Is a naturally occurring mineral fiber that has been used commonly in a variety of building construction materials for insulation and as a fire-retardant. The EPA has banned several asbestos products. Manufacturers have also voluntarily limited uses of asbestos. Today, asbestos is most commonly found in older homes, in pipe and furnace insulation materials, asbestos shingles, millboard, insulation, textured paints and other coating materials, and floor tiles. The most dangerous asbestos fibers are too small to be visible. After they are inhaled, they can remain and accumulate in the lungs. Asbestos can cause lung cancer, mesothelioma (a cancer of the chest and abdominal linings), and asbestosis (irreversible lung scarring that can be fatal). Symptoms of these diseases do not show up until many years after exposure began. Most people with asbestos-related diseases were exposed to elevated concentrations on the job; some developed disease from exposure to clothing and equipment brought home from job sites.

Asbestos is a naturally occurring mineral

## ASBESTOS ABATEMENT

Triangle Environmental Science and Engineering Inc. is dedicated to providing a fast and efficient response thus minimizing potential slow-downs in construction schedules. Report documentation is specifically designed to comply with local and Missouri State guidelines. Thus avoiding costly delays in your demolition/renovation process

ROAD ROLLA MO

Triangle also performs Asbestos Air Monitoring

WE can assist in your abatement projects. We are Missouri Licensed Air sampling professionals and can provide PCM and well as TEM Air monitoring.

## TRIANGLE ENVIRONMENTAL SCIENCE AND ENGINEERING INC.

Has been providing professional environmental services to central and south central Missouri for over 30 years.

Missouri State law requires building owners to obtain an asbestos survey when demolishing or renovating any commercial building. The asbestos survey or inspection is used to assess and quantify the presence of asbestos containing building materials in a public building.

We routinely perform asbestos inspections under EPA National Emission Standards for Hazardous Air Pollution (NESHAP) and American Hazardous Emergency Response Act (AHERA).
